# Dental Consent Form

*Please read carefully and sign below.*

Dentistry is unpredictable since it is not possible to thoroughly examine an animal's mouth while they are awake. We may not find problems in your pet's mouth until they are anesthetized. Dental x-rays and extractions may be necessary. We are unable to estimate the cost until we are in the process of the dental cleaning, so we need you to be available to consult with throughout the day. We include an IV catheter and fluids to all of our dental patients. We highly recommend a pre-anesthetic blood profile for the best care of your pet.

\*The following price list will give you an idea of what extra dental services may cost.

Dentistry Base Price for Dogs	\$390
Dentistry Base Price for Cats	\$390
IV Catheter & Fluids	included
Pre-anesthetic blood work	\$50-60
Extra anesthesia for an extended dentistry	\$75/hour
Extended dentistry time	\$50.00
Dental X-Rays	\$85 each
Minor Extractions	\$7-\$12 per tooth
Major Extractions	\$39-\$300 per tooth (time dependant)
Gingival Flap	\$40/ Gum flap
Antibiotics	\$30-40
Pain Control Package	\$10-19

\*Pain Control will be given to any animal with extractions, but is not included in the extraction price.

As you can see, the cost of the dentistry may increase with any extra service needed for the health of your pet. We need to be able to reach you at any time today in order to gain your permission to give the best care to your pet and proceed as recommended by your veterinarian.

If you are unreachable during the day, we will wake up your pet without proceeding. We will then have to schedule another appointment to continue the needed care, which will be much more expensive in the long-run.

If you are unreachable and would like the best care provided for your pet, you may give us a maximum spending allowance so that we may do the best that we can to stay within your budget.

**\*\*\* 1) Please notify me of any services beyond the standard dental before proceeding.**
